### Methodology

The TIGER 21 Asset Allocation Report measures the aggregate asset allocations (on a trailing 12-month basis) of TIGER 21 Members based upon their individual annual Portfolio Defense presentations. Each individual Member generally reports on their portfolio annually, so that in any given month of the year approximately 1/12th of our membership reports. Each quarterly data set represents data for the prior 12 months (from quarter's end). This methodology tends to reveal substantive trends more clearly and is less affected by short-term distortions stemming from our growing membership questions.
